

Healthy Children Needed for Autism Research

The **National Institute of Mental Health** is studying autism. There is an opportunity for healthy children to participate in the studies. Participation in the research includes a comprehensive **developmental evaluation and physical examination, and follow-up visits**. Results of these assessments will be shared with parents.

Participants must:

- be between 1 and 4 years of age (up to his/her 5th birthday)
- be available to come to the NIH Clinical Center in Bethesda, Maryland for:
 - an initial evaluation
 - 2 to 6 follow-up visits, to be determined by age of entry

Compensation is provided.
